

JS

CSS

```
$("#appearance7").roundSlider({  
  radius: 80,  
  width: 8,  
  handleSize: "+16",  
  handleShape: "dot",  
  sliderType: "min-range",  
  value: 24  
});
```

⌵ Custom Handle Shapes

The handle shapes are defined in the **".rs-handle"** class. By customizing this class we can make different shapes of handle.
